

Belief in reincarnation is an ancient phenomenon. Reincarnation, literally “to be made flesh”, is a doctrine or mystical belief that some essential part of a being survives Death to be reborn in a new body. The Spirit is the essential element of the transformation. As a result, a new personality is developed during each life in the physical world, but some part of the being remains constantly present throughout these successive lives as well.

Built in 1920, the Alpha Hospital was established to provide primary Health Care to a community in need and with its reincarnation into a modern mixed use retail/office complex nearing completion, it will once again become an indispensable spirit contributing to the life of the King-Lincoln District community.
